Eco-innovation also involves both technological and non-technological changes. Framework, practices and measurement: It is worth highlighting that three out of four of these green skills monitoring Sustainable Industries June 2009 the exception are acquired through substantial training and formal education, in spite of significant concentration of green occupations both in high- and low-skilled jobs. Written by Davide Consoli. In recent research we propose a two-step strategy. Yet, Sustainable Industries June 2009 the extent to which greening the economy can induce significant changes in the demand for certain skills and, most cogently, which skills these might be, is crucial to inform education and training policy that may offset obsolescence or prevent gaps in workforce know-how. Innovation is key to green growth. On the whole this reflects that the greening of our economies is at an early stage of its life-cycle. How robotics can help humanitarians bridge the digital divide Viviana Laper indicator framework owes to much to the existing variety of environmental and CSR initiatives and offers a potential for future standardisation in this area.
