Both nurses and CNAs described how knowledge they held of resident preferences and needs were ignored by those in the position to develop care plans. Results We begin to present the results of our analysis in Table 3. There is, of course, liable to be variation in the degree of market openness countries will uphold, which we will discuss later, but the

point is that the global financial community imposes constraints on economic policies.

Dependability was assured through written focus group protocols, first-

We called on the World Bank to play a leading role in responding to problems whose nature requires globally coordinated action, such as climate change and food security, and agreed that the World Bank and the regional development banks should have sufficient resources to address these challenges and fulfill their mandates. The IMF should continue to strengthen its capacity to help its members cope with financial volatility, reducing the economic disruption from sudden swings in capital flows and the perceived need for excessive reserve accumulation.

We share a collective responsibility to mitigate the social impact of the crisis.

World Bank, working with the regional development banks and other international organizations, should strengthen:
